

Kane Detention: Protection by Kane. Kane Detention's mission has always been clear: Meet or exceed the standards required by law enforcement and government organizations to help maintain order in challenging environments. In the late 1970s, we revolutionized and reestablished the standard in prison safety products with the installation of never-before-seen woven rod cell fronts at Leavenworth Penitentiary. Since that landmark endeavor, the Kane Detention brand has been entrusted with thousands of installations by the criminal justice community to contain inmates and keep corrections personnel safe with barrier walls, ceilings, cell front doors and tamper-proof equipment. National security offices, jails, courthouses and other institutions that demand the highest levels of protection, rely on Kane's unmatched reputation and performance record for safer criminal justice environments.

FLEXIBILITY, PRECISION & GUIDANCE

“To comply with United States Marshals Service Standards on the Thomas S. Foley United States Federal Courthouse project, steel cell walls were used in lieu of standard masonry units. Kane Detention skillfully engineered their Vantage Wall cell fronts to accommodate our needs. Not only did Kane assist us in meeting all USMS specifications, their design flexibility, precision and guidance made them very much a valued partner in the success of this project.”
BOB ESTLUND, JUSTICE FACILITIES SPECIALIST, ASSOCIATE, INTEGRUS ARCHITECTURE

DETENTION BARRIERS

Our patented Vantage Wall barrier products provide security, protection, separation and containment in indoor or outdoor areas and are available in four levels of strength, from medium to super-max. Commonly utilized as cell fronts, our detention barriers are also ideal for walkways or recreation yards, window openings or ceiling enclosures.

 DETENTION CEILING + EQUIPMENT

Stainless Steel Modesty Panel
THOMAS S. FOLEY FEDERAL COURTHOUSE
SPOKANE, WA

Kane's heavy-duty detention equipment offering includes stainless steel contoured benches, stools, modesty panels and more. For increased security — and a reduction in noise pollution — maximum security ceilings by Kane are a smart choice. Sound-deadening insulation backs each 24-inch, 14-gauge, steel plank.
