

Sterling Dula: Railings + Fencing by Kane. In today's world, where the unpredictable has become the norm, every component of every building must anticipate how people live, learn, work and play. Sterling Dula railings are no exception. They're built to survive the constant hum of human activity in the harshest of environments – from frigid northern winters, to sizzling southern summers and everything windy and rainy in between.

At Kane Innovations, our philosophy is simple: Engineer and fabricate flawless railing and fence systems that stand ready for the unexpected. Whether you choose one of our standard solutions, or a more innovative, made-to-order design option, the Sterling Dula team will configure a system that assists in creating a breathtakingly beautiful, secure environment, both inside and out. After all, a structural masterpiece is of little value if its occupants don't feel safe.

PICKET RAILING SYSTEMS

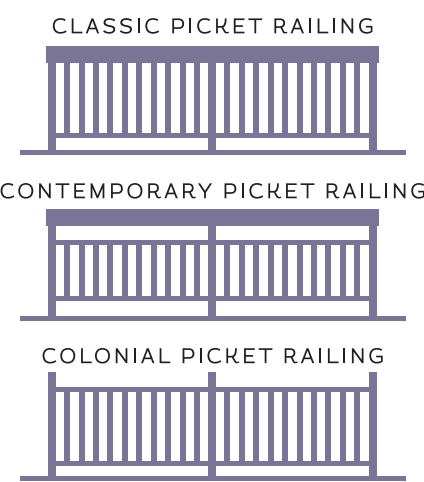

EXCEPTIONAL PROBLEM SOLVERS
 “After we received our initial order of Classic Picket Railing for the Holiday Inn San Antonio project, we had a last minute request come through from the property owner for 21 additional feet of railing. Time was a key concern, since this was not a duplicate order and required custom baseplates and longer sections. Not only did Sterling Dula redesign the mounting conditions to fit the profile of the concrete slab, they expedited engineering and fabrication, with the shipment arriving on the jobsite ahead of schedule.”
 JOHN EBERWEIN, PRINCIPAL/VICE PRESIDENT, ENVIRONMENTAL GLASS, INC.

Sterling Dula's Wire Mesh and Perforated Panel systems provide the modern look of metal infill while allowing air and light to pass through. Where greater visibility is a necessity, opt for wire mesh infill. For increased privacy, consider our perforated panel for a sturdy shield against unwelcome interference in open areas.

PIPE RAILING SYSTEMS

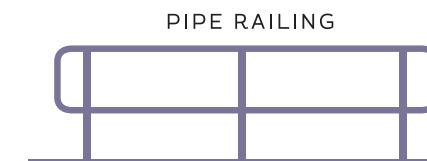

Pipe

WRIGHTSVILLE BEACH
PUBLIC SAFETY BUILDING
WRIGHTSVILLE BEACH, NC

Traditional and ubiquitous, pipe railing is commonly installed in high traffic areas – such as frequently traveled walkways, transportation stations, amusement parks and more. Sterling Dula offers a choice of stainless steel pipe railing for decorative applications, or aluminum handrails for stairs and ADA wheelchair ramps. Our pipe systems are as dynamic as the people they assist and protect.
